SUMMARY

Full-stack developer using React, Django, and Python to build scalable web applications and REST APIs. Focused on clean architecture, performance, and solving real user problems. Applies Data Structures Algorithms to deliver efficient and reliable solutions.

SKILLS

Languages: C++, Python, JavaScript
Frontend: HTML, CSS, JavaScript, React
Backend: Django, REST APIs
Database: MySQL
Tools: Git, GitHub, Postman
Core CS: Data Structures & Algorithms, Basic Security Concepts
Spoken Languages: English, Hindi

PROJECTS

Free Skill Swap Platform

- Designed and developed a full-stack web application enabling users to exchange skills without monetary transactions.
- Built backend services using Django to manage user authentication, profiles, and API endpoints.
- Developed a responsive frontend using HTML, CSS, and JavaScript.
- Implemented RESTful APIs for seamless client-server communication.
- Ensured clean, modular, and reusable code with version control using Git.

E-Commerce Web Application (React)

- Built a responsive e-commerce web application using React for seamless shopping experience.
- Implemented product listing, search, filtering, and cart functionality.
- Integrated APIs to fetch dynamic product data.
- Used React hooks and components for efficient state management.
- Designed clean and user-friendly UI for better user experience.

Swiggy Clone (React + Live APIs)

- Developed a responsive food delivery web application using React.
- Integrated real-time APIs to dynamically fetch restaurant and menu data.
- Utilized React hooks, components, and props for efficient state management.
- Improved user experience with optimized UI rendering across devices.

Mini Twitter Clone (Django)

- Built a social media application with user authentication and session management.
 - Implemented features like tweet creation, image uploads, and user dashboards.
 - Designed a clean and intuitive UI for improved usability.
 - Managed backend logic and database interactions using Django ORM.
